

Dear All,

Android ELO Computer Module (AECM) for IDS Series Touch Display

Model: ECMG-2-AND

The ELO Interactive Digital Signage (IDS) touch platform featuring the powerful Qualcomm Snapdragon APQ8064 CPU provides the performance needed to manage demanding, media-rich interactive digital signage software applications while enabling omnichannel consistency when coupled with EloView. Together, they allow customers to securely leverage existing online and mobile digital content with minimal investment and development time.

ELO's ECMG2-AND computer module, available for use with the ELO 3201L, 4201L, 5501L and 7001LT IDS touchscreens, slides into the back of the touch screen display to deliver the industry's thinnest commercial grade all-in-one Android touch computer at 32-inch, 42-inch, 55-inch or 70-inch screen sizes. Use of computer modules instead of a separate external computer "box" reduces complexity, by seamlessly incorporating the AC power, video and USB signals between the computer module and the ELO IDS touch display via an internal docking connector. Centralized management and security capabilities of Qualcomm Snapdragon ensures compatibility with many content management servers and web-based consoles for seamless connection with the internet, applications, digital marketing, interactive whiteboard, building directory, virtual receptionist, and point of information (POI) applications. The AECM can support optimal partitioning of locally cached and network stored content, allowing developers to monitor and deploy content via device-to-device or web connections.

The high performance, commercial grade computer module, coupled with the EloView cloud-based management software, makes any IDS 01 series monitor a complete interactive platform.

Android ELO Computer Module (AECM) for IDS Series Touch Display

Features:

Qualcomm® Snapdragon™ APQ8064 CPU	2 GB RAM	16 GB flash
4x USB 2.0 ports	1x USB On-The-Go (micro USB)	
1 GB LAN	Built in Wi-Fi 802.11 b/g/n	
Bluetooth 4.0	iBeacon	
Antenna Included	GPIO	
Home Button	Power LED	

Part No. List:

Part No.:	Description:
E000739	ELO-KIT-ECMG2-AND
